EXAMINER'S AMENDMENT

This application is in condition for allowance except for the presence of claim 6 to an invention non-elected without traverse. Accordingly, claim 6 has been cancelled.

The following is an examiner's statement of reasons for allowance:

Claims 1-5, 7 and 8 are allowable for the reasons presented by applicant in the amendment filed October 21, 2003. It is noted that applicant's specification discloses on page 3, lines 5-19 that when the filtrate to which the coagulant has been added after pH adjustment is supplied to an evaporator or stripper for heating, the trace amount of ammonium carbonate included therein releases carbonic acid. Accordingly it is clear that carbonic acid may be present in the filtrate of the admitted prior art process after the pH adjustment. However applicant's claims require "adjusting the pH of the filtrate to 9-12 while simultaneously adding carbon dioxide and/or an aqueous carbonic acid solution, or else adjusting the pH to 9-12 after adding carbon dioxide and/or an aqueous carbonic acid solution" (emphasis added). There would be no motivation from the prior art to modify applicant's admitted prior art process by adjusting the pH of the filtrate to 9-12 while simultaneously adding carbon dioxide and/or an aqueous carbonic acid solution, or else adjusting the pH to 9-12 after adding carbon dioxide and/or an

Art Unit 1754

aqueous carbonic acid solution, as required by applicant's claims. The release of carbonic acid from the trace amount of ammonium carbonate after pH adjustment in the admitted prior art process would not suggest or provide motivation for such step.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
